Claims 15-16 (canceled).

The following is an examiner's statement of reasons for allowance: The examiner has found claims 1-14 to be unobvious over the prior art of record and therefore to be allowable over the prior art of record. The present invention relates to a method for reducing the quantity of Desulfovibrio and/or Helicobacter spp. in the GI tract of a companion pet, treating GI tract inflammation in the pet and reducing odors (gas and stools) of the pet, which comprises orally administering to the said pet a Desulfovibrio and/or Helicobacter spp. reducing quantity of a fiber including a galactooligosaccaride, a galactan, a beta glucan and a mixture thereof. The very relevant prior art document (US 5,444,054) to this invention discloses a method of treating inflammatory condition of the GI tract (including ulcerative colitis and inflammation of the colon) in a mammal with a fiber, which is a fructooligosaccharide or a xylooligosaccharide. However, the prior art document does not teach or suggests the use of fibers disclosed in the instant invention (including, a galactooligosaccaride, a galactan, a beta glucan) to reduce the
